AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Please replace the paragraph beginning at page 17, lines 5 – 8, with the following amended paragraph:

- Pour test solution onto the centre of the core sample. Amount of test solution should be 50% of the laminate design capacity. The design capacity [[to]] is the total available capacity of the absorbent core[[s]] to be tested, and herein is to be understood as laminate CRC capacity of the cut out core sample piece as defined below.
